Emily: I hugely suggest this book! i discovered it pointed out within the e-book i lately examine the Nakba (the 1948 expulsion of the Palestinians). It didn't disappoint! Interestingly, I had simply entire Slaughterhouse 5 whilst I picked this one up and there are a few remarkable similarities within the tone of the 2 books. either authors spotlight the absurdity in their occasions in a concise, matter-of-fact attitude. And either major characters are visited through aliens.Saeed, finally leaving the area with the extraterrestrial beings he meets all through his life, writes a sequence of letters describing his reports as a tender guy in 1948, and as a Palestinian within the newly shaped nation of Israel. This booklet fairly conveys the typical humiliations and absurdities of existence within the new state. He befriends the Israelis and works as a part of the Palestinian employees movement. attempt as he could to be dependable to the state, to be quiet and never offend anyone, he's always in trouble, wasting his son to the innovative movement, and finishing up in jail. Woven via his narrative are the tales of many villages and people, the uprooting and sorrow in their situation.
