## Description

Washington had been working its data banks and computers overtime. Finally, the machines came up with a name: James Barbour Matlock, the perfect man for the assignment.

This assignment was to cause Matlock and his loved ones great pain. But the soundless machines and the faceless men didn't care as long as a conspiracy called Nimrod was destroyed.

"A 110% story all in overdrive, extraordinarily readable ...Ludlum writes better and better."  
(Kirkus Reviews)

## Insightful reviews

Rajan: I read it a long time ago and enjoyed it thoroughly. The story takes time to build up and a little confusing in first part. But when he sets up the plot nicely the story picks up pace in second half and everything makes sense. Reading it like solving a jigsaw puzzle.

Suby: The narrative is authentically Robert Ludlum style. But the story line is not as impressive as his other books I have had the opportunity to read.

Universities using their manpower resources to control the Mafia that run the drug and other related trades is a new revelation. They try and obtain the finances to run the universities by providing the services that normally the Mafia does. Matlock gets involved in the Justice Department effort to find out what is going on. That he succeeds is besides the point. What is most worrisome is the inclination of the youthful students and young faculty to fall prey to the drugs and prostitution rackets.

While appreciating the fact that this was the 3rd of Robert Ludlum's books, written in 1973, I must say that I have read better books by the same author.

Barry: Awful! One of the worst books I've ever wasted my time finishing! The plot was good which is why I gave it two stars. But, the writing wasn't even worthy of a high school freshman!

I've read other stories by Ludlum that are light years better than this, so I'm forced to assume someone else wrote it and Ludlum was somehow blackmailed into putting his name on this incredible piece of crap!

In addition to the grade school writing style, the extensive use of italics to show all manner of emotion was so over used that if I see another italicized word, I may have gouged my eyes out!

I can not be any more emphatic in my urging that no one else ever read this book for the rest of time!

Serdar Halliyev: i actually loved the book. attention-grabbing storyline and retains the reader relocating directly to discover what's coming...

---

Becky: Ludlum has the psychology perspective down pat. that's what makes his books stand proud of others who do not realize the subtlety of human motives. at the very lowest degrees the "good cause" excuse for habit is especially obvious here. whereas instructive it doesn't reference the various degrees of such rationalizations glaring within the universal daily global all of us inhabit. however the examine this is very fascinating within the info and the meaning, contemplating what it states concerning the children. there's a rate to pay whilst the adults promote out the youngsters telling them it really is for a "good cause" and therefore, okay.

Bill Donhiser: An stress-free story, I loved interpreting it. reliable plot good performed yet now not relatively as intriguing to me as a few of his different works
