Description

Mind the gap.

Something odd is going on in the basement of an old house in London. An inexplicable gap has formed, a gap in time that links the present to the past. And twelve-year-old Tom, who discovers the gap while on a visit to his grandmother, is torn between both worlds.

Lured by a mysterious voice, Tom leaps into the early eighteenth century, to a time when circus "freaks" like the Bendy Man and the Gorilla Woman appeared at Bartholomew Fair. The voice he hears belongs to Astra, a tiny changeling child, whose limbs are no bigger than a man's thumb. She has called him into the past, because she is convinced that Tom is the only one who can help her and her friends from danger. Doctors are paying a high price for unusual bodies to dissect, and Astra and her friends are prime subjects.

But Tom is dealing with difficulties of his own. His mum has cancer and is constantly fighting with his gran. And then he discovers a dark secret in his family's past . . . a secret that pulls the strands of time together and might just close the gap forever.

Insightful reviews

Christiane: Hands down, my favourite book. The added social/historical content was a bonus.

Heather Miller: Another Time Travel book. Really great characters and was a great story about friendship, loyalty.

Sally: I need some sort of sideshow-freak tag. Tempted to use magical-creatures for Astra the Changeling but that's a bit misleading. Anyway, awesome book and a perfectly thrilling story, set both in present-day London and 1717. Would have liked a little more after the end, and in some places a little more explanation, but it's still definitely a 5-star book.

The ending was *perfect* too with the intonation at the tube station of MIND THE GAP. Sends the right kind of shiver down your spine. :)

Amy Louise: i actually loved this e-book and the characters.

Christine Jackson: Cute, candy publication a couple of boy who time travels. I loved the best way the characters cared approximately one another and different relations dynamics.

Bettie?: domestic audioErm - no longer for me at this time.
