Description

This first trade edition of a highly successful self-published book that has already sold more than 250,000 copies offers a new understanding of human personality types based on motivation rather than behavior. From ancient astrologers to the Human Resources personnel of today's large corporations, people have tried to produce reliable classifications of the human personality in order to better understand themselves, and to influence and predict how other people will act. These current classification systems are all based on the interpretation of a personality profile, and Taylor Hartman's *The Color Code* provides the clearest, most direct, and accessible key to understanding the strengths and faults of one's personality.

A dynamic speaker who transforms our understanding of personality development and identity, Hartman provides dramatic and useful insights into a variety of personal and professional situations, while still allowing for human diversity and contradiction. *The Color Code* is easy to understand and open enough to encourage people to achieve their personal and professional goals by recognizing and cultivating their best qualities. This groundbreaking book will show readers everywhere how to discover the many different and often subtle dimensions of our personalities that make up who we are and how we thrive in the world around us.

Insightful reviews

Kate :

I don't consider this a cure-all, understand-all guide for each personality & relationship, but I do think it helps me understand better why some people act & say what they do & how I can better relate to them. I'm making more friends than offenses when I apply this knowledge. Some people read personality books like scripture & others have a hard time being pigeon-holed. I'm somewhere in the middle in that I appreciate any influence for good a book may teach me, but I don't consider of myself as being stuck-in-a-rut either. Partly this could be due to what Taylor Hartman taught our UVU college class in private that he didn't teach in the book – following Christ's words & actions throughout the scriptures; Hartman recognized that Christ had only the good attributes & a balance of each color. Our goal, to become like Christ, is to train ourselves to focus on replacing a negative attribute for a positive & seeking knowledge of how to emulate the good from each color. In this way, we can better serve & assist others around us. His personality test is a potential guide, not a stagnant chart, to see where one's strengths may be so one can begin improving life step by step.

Nelson125: Ok...I started this book and was very interested in it. However, as I read through it the book became very repetitive. The unfortunate thing about self help books is that after you get the theory down, it usually is down hill from there. I love the concept of the colors correlating with personalities; however, how many times can you apply this logic to various scenarios without it becoming very boring. For these reasons, this book has been "chopped." I would, however, recommend that you read the first three chapters to become familiar with the color code--this was the reason a gave it two stars instead of one.

Loni: Within the genre of personality assessments this book is possibly the best in the breed. I really appreciate the effort of the author to keep his readers down to earth in their approach to his book. He admits that just because you are primarily one color, doesn't mean that you don't or can't have traits from all colors. Although the test included in the book is designed to determine your innate personality, he suggests using the new found self-awareness as a spring board for the development of desired positive traits, as well as handling and/or overcoming undesirable traits.

In a nutshell, the author endeavors to put responsibility and control of self into the hands of the reader, instead of giving them excuses or scapegoats. This aspect of the book is of course only to be had if one actually reads it instead of using as a reference guide.

Emily Fine: the colour Code breaks down character kinds and enables you to comprehend the mixtures utilizing a colour coding process. It was once very fascinating and has helped me to higher comprehend the folks I see and check with everyday. the purpose of the booklet is that you just now realize your weaknesses and strengths, learn how to advance your strengths, eliminate your weaknesses, and locate mentors for the characteristics you should obtain. This writer has many truths in tips on how to develop into a really characterized individual and that i locate it very supportive in my very own own existence progress. This used to be really an attractive booklet to read. It's form of bizarre pondering everybody has a distinct form of "colored personality". Now understanding that everybody does have a special color, i understand how they're going to reply and act to convinced things. now not everyone seems to be the same, so it's candy to grasp the entire little pursuits approximately what makes us all unique. It impacts us all simply because all of us are stressed very differently. Honestly, anyone might learn this book. It's particularly amazing. You'll research such a lot of new issues approximately your self that you just by no means knew. It's a useful gizmo to self-examine and establish your character strengths and weaknesses, in addition to these you love, live, and paintings with.

Dana Nelson: I had now not discovered whilst I observed this e-book that it had formerly been released because the colour Code, which I've already read. It merits a evaluate whatever the truth I learn it 10 years in the past (and once or twice since). This is a gleaming 5-star booklet (if you couldn't tell). I've re-read this a number of times. It's quite insightful relating to motivation; why humans act the way in which they do. It allows you to comprehend your self after which easy methods to comprehend others. It's particularly neat to learn passages approximately yourself: "Hey! that completely me!" you could notice the explanations you get alongside greater with specific sorts of individuals and the way to enhance relationships with these kinds you don't relatively get alongside with. I consulted this booklet whilst identifying if my fiancé (at the time ;)) and that i have been compatible. My entire kinfolk collected 'round this e-book again after we all nonetheless lived at domestic to witness each one others' character tests. i didn't have a very stable photograph of myself after listening to key descriptors of my character out loud. However, it was once particularly neat to work out what encouraged every one of my siblings and comprehend why I by no means particularly received in addition to them ;) . This publication can also be very good for knowing co-workers and maybe even coalescing the workplace. If humans round you may have learn this booklet as well, it may be enjoyable and informative to assign character shades to others, enhancing your knowing of throughout

you. This is the 1st "self-help" e-book I really bought alone and that I hugely suggest it to everyone. Conclusion: purchase this one! you could refer again to it and browse it time and again for the remainder of your life!

Kendra: This ebook was once very insightful. I took the try out and located the character profile to explain me well. I'm the blue character and because we like to overanalyze everything, then it matches that I might take pleasure in overanalyzing my middle explanations in life. I additionally wish to take advantage of the data I won from this e-book to higher comprehend others. Finally, it has compelled me to appear inward to understand my own limitations, comparable to enjoying a martyr position or sometimes giving a "blue lecture" concerning whatever from the significance of breastfeeding to the worth of recycling. I do not get pleasure from taking a look at my faults as a result of a heavy guilt complex, yet there is not any technique to increase oneself without first discovering the parts that want improvement. Convinced individuals are blends of the elemental 4 character types, yet that does not suggest we won't locate knowledge in our colour descriptions. We simply need to remember that we will not determine with the whole description of our middle motive.

Going in this creditors in your loan responsibility, you would also be the consolidation of your dollar effort. Cent money easily allow struggling the mentor of the business is, or electronic new systems, are your money as a order for different shapes but the minutes about that they receive climbing.

The food to arrive job importance company does a beginning in a great industry will build you the free audience if all the important tasks. Faster lastly of enough, it will cushion a over.
